Hi Annie:

Hope you don't mind fielding a few more questions.

My understanding is that there are eight forms of cocaine: pseudo (D and L), allo (D and L), pseud-oallo (D and L), and cocaine (D and L). Did I get that right?

It is also my understanding that only L-allo and L-cocaine qualify under Mass law. Is that right?

And can you forward the statute/regulation that limits the definition of cocaine under Mass law to L and non-synthetic forms?

Thanks again, Annie.

Theo
